Special Issue

Low Power Integrated Circuit Design, Sensors and Their Applications

Message from the Guest Editors

Cheap sensing technologies are essential with the growth seen in the Internet of Things (IoT) devices. The main cost of such devices is mainly due to the cost of management (for example, changing their batteries) or fault detection of a sensor. To this end, low-power smart sensors powered by energy-harvesting mechanisms are in extreme demand in different applications, including but not limited to biomedical devices (wearable or implants), smart farming, smart home, underground IoTs, etc. In this Special Issue, we invite researchers to submit their original ideas on (but not limited to) lowpower sensing mechanisms based on novel approaches, low-power sensor interfacing enabled by CMOS circuit and architecture techniques, sensors enabled by emerging technologies such as spintronics, memristive devices, etc., and novel energy-harvesting mechanisms enabling a longer lifetime of IoT devices.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
