

Topical Collection

Liquid Chromatography: Its Effectiveness in Food Safety

Message from the Collection Editors

In recent years, consumers have been concerned about food safety issues. This Topical Collection aims to highlight how liquid chromatography contributes to the rapid, accurate, and sensitive analysis of various substances/contaminants which are important for food safety. For this purpose, liquid chromatography is an important analytical technique. The aspects of method development, the identification of new contaminants with different detectors, new materials for extraction, and green extraction solvents are subjects of interest for this Topical Collection. It is my pleasure to invite you to contribute your research article, communication, or review to this Topical Collection dedicated to liquid chromatography and its effectiveness in food safety issue.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
