Special Issue

Biological and Toxicological Activities of Plant Extracts and Their Extraction Methods

Message from the Guest Editors

Nowadays, natural products are increasingly receiving more attention from the scientific community, not only because they may pose less risks than their synthetic equivalents, but also because they are a part of the vast majority of agro-industrial wastes (food processing, agricultural residues, forestry logging operations, etc.). Thus, their valorization is seen as a stepping stone toward a more sustainable approach for the further development of scientific progress, industry and economic growth. With that in mind, this Special Issue is dedicated to toxicological activities (contact toxicity. anti-feeding, repellency, fumigation, molluscicidal, etc.) and biological activities (antioxidant, antibacterial, antifungal, anti-inflammatory, antiobesity, antiacetylcholinesterase, etc.) of extracts derived from all kinds of terrestrial or marine species, as well as agroindustrial wastes. We will accept works employing innovative and green extraction/isolation methodologies; bioassay-guided approaches are much appreciated, but classical extraction methods may be included. We look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, Separations, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman

Department of Chemistry, Dartmouth College, Hanover, NH 03755, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
