

Special Issue

Application of Chromatography and Different Extraction Techniques in Analysis of Polyphenolic Compounds

Message from the Guest Editors

Polyphenolic compounds comprise a diverse class of chemical compounds present in different plants. Analysis of these compounds could be a challenge due to the complexity of plant materials and polyphenols. Notably, chromatographic methods are the golden standard for the separation and quantitation of these interesting molecules. Due to the different properties of various plant materials, it is mandatory to have a precise and reliable extraction and chromatographic method for the analysis of phenolic compounds. This Special Issue will comprise research articles, short communications, and reviews related to the main analytical tools used for the analysis of polyphenolic compounds. Manuscripts concerning new analytical approaches with regard to plants, foods, and other products are welcome. Furthermore, research regarding other aspects, such as the application of chromatographic methods for the determination of polyphenolic compounds in a different type of sample, is also encouraged.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
