Special Issue

Separation, Extraction and Purification of Natural Products

Message from the Guest Editors

While conventional extraction and separation methods are time-consuming, laborious, and costly, advanced protocols are more efficient, convenient, and rapid. However, the current methods revolve around the small scale and do not satisfy applicability and sustainability at larger scales. Therefore, the discovery of novel methods and the development and improvement of the separation, extraction, and purification procedures of natural products are essential for future applications. This Special Issue seeks to publish qualified studies focused on innovative methods, simplified processes, and highly applicable protocols in the separation, extraction, and purification procedures of natural products. We also welcome researchers and investigators to contribute their findings and reviews on the applicability and sustainability of natural compound extraction on the industrial scale. In particular, studies on the separation and isolation of anti-coronavirus and anti-SARS-CoV-2 compounds from natural sources are highly sought after in this issue.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
