

Topical Collection

State of the Art in Separation and Analysis of Energies

Message from the Collection Editors

In general terms, “energies” can be defined as developments and applications with regard to energy supply, conversion, application, and storage. In this Topical Collection on “State of the Art in Analysis of Energies”, we welcome original research and review articles on the development and application of analytical methods in this field. Analysis of energies is a broad field and can range over all separation techniques and detection methods. However, theory and methodology aspects should focus on instrumentation and not on modeling or theories with regard to energy application. Impurity analysis and especially identification/quantification of compounds are of particular interest. Reports on quality control and standardization of energy products or materials will also be considered on the basis of their significance in the field. In all cases, novelty will be the major suitability criterion of submitted articles. Authors should always address the novelty of their proposed methodology and comparison with previously reported methods.

About the Journal

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755,
USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
