

## Special Issue

# Detection, Fate and Removal of Contaminants of Emerging Concern in Aqueous Environment

### Message from the Guest Editor

A vast array of chemicals is released into the environment from industrial and household products and applications. Some of these chemicals have been classified as contaminants of emerging concern (CECs), and most of them have not been regulated or commonly monitored in the environment. At the same time their fate, behavior and ecotoxicological effects and have not been fully evaluated for the risks they might pose to the environment. In some cases, their release to the environment has likely occurred for a long time (pharmaceuticals, hormones, sunscreens, UV filters, disinfection by-products, etc.), but may not have been recognized as CECs until new detection methods were developed. The aim of this Special Issue is to cover the developments in the determination of CECs as well as their fate and removal from aqueous environment.

## About the Journal

### Message from the Editor-in-Chief

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Separations*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
