

Special Issue

Molecular Biology of Chronic Sinusitis

Message from the Guest Editors

Chronic sinusitis is a universal disease, which significantly impacts patient morbidity. Its impact is felt, both at a personal level, and by society at large with respect to healthcare expenditures and allocated healthcare resources. The etiology is considered to be multifactorial and may be related to allergen exposure, genetic predisposition and/or persistent infection. This Special Issue of *Sinusitis* will focus on the molecular biology of chronic sinusitis, including concepts of etiology, the inflammatory cascade, microbial agents which may affect cytokine expression and treatment modalities, including the traditional steroids and newer emerging agents.

About the Journal

Message from the Editor-in-Chief

Author Benefits

Open Access:

free for readers, free publication for well-prepared manuscripts submitted in 2018.

Rapid publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 6 days (median values for papers published in the first six months of 2018).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
