Biomechanics of Resistance Training - New Trends in Strength and Power Training

Message from the Guest Editors

Resistance training is based on the use of external loading during human movement, where the mechanical variables play a crucial role. The mechanics of exercises can determine the performance outcomes, injury occurrence or the effect of specific training methods (such as post activation potential). Therefore, a great deal practical and theoretical fields can benefit from biomechanical approaches to resistance training. The are two objectives of this special issue. First of all we would like to present how biomechanical approaches are related to resistance training, and what are the crucial biomechanical variables useful for resistance training practice. Special attention is given, but not limited to, kinematic differences in complex exercises, muscle activity during resistance exercises,

About the Journal

Message from the Editor-in-Chief

Sports (ISSN 2075-4663) is a peer-reviewed scientific journal that publishes original articles, critical reviews, research notes and short communications in the interdisciplinary area of sport sciences and public health. It links several scientific disciplines in an integrated fashion, to address critical issues related to sport science and public health. The journal presents diverse original articles, including systematic and narrative reviews, cohort and case control studies, innovative randomized trials, and formative research using qualitative and quantitative methods with the aim to provide information for researchers to plan intervention programs. It addresses diverse public health, physical activity and exercise science topics.

Editor-in-Chief

Prof. Dr. Eling Douwe De Bruin

1. Institute of Human Movement Sciences and Sport, IBWS ETH, HCP H 25.1, Leopold-Ruzicka-Weg 4, CH-8093 Zürich, Switzerland
2. Karolinska Institutet, Stockholm, Sweden

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Sport Sciences) / CiteScore - Q2 (Physical Therapy, Sports Therapy and Rehabilitation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
