

## Special Issue

# Oral and Maxillofacial Surgery: Balance Between Innovative and Proven Procedures, Drugs and Materials

### Message from the Guest Editors

The clash between experience and modernity is a particularly delicate issue in medicine. Effective and safe treatments are always a balance between the old and the new. I invite you to cocreate, with the aim of presenting the best proven practices, innovative clinical management and prospects for the development of oral and maxillofacial surgery. Potential topics include, but are not limited to: best proven vs. the latest diagnostic methods; advances in craniofacial traumatology; predictable orthognathics in the context of digitization; innovations in the treatment of temporomandibular joints; apparent stagnation in inflammation therapy; constant and developing aspects of oncology; novelties vs. traditional methods in reconstructive surgery; dental implantology: the evidence-based race of innovation; postsurgical maxillofacial prosthetics; importance and new possibilities of postoperative observation; failures necessary to share to avoid their occurrence.

## About the Journal

### Message from the Editor-in-Chief

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2024).
