

Special Issue

New Approaches to Tissue Engineering for Musculoskeletal Repair

Message from the Guest Editor

“New Approaches to Tissue Engineering for Musculoskeletal Repair” is an upcoming Special Issue to be published in “*Surgeries*”. Its goal is to present the major progress achieved in the field of musculoskeletal tissue engineering and the latest discoveries, including novel methods and strategies, that add to the technological advancements of our clinical capabilities to treat musculoskeletal defects. The Special Issue will accept original studies and reviews on the array of novel bioengineering technologies that include highly integrated approaches, such as stem cell technologies, biomaterials, gene therapy and other regeneration therapies for the repair of musculoskeletal defects. We propose a submission deadline of 5 April 2021. Please feel free to circulate this announcement to others you feel might be interested.

About the Journal

Message from the Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.5 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2024).
