

Special Issue

Circular Economy and Sustainability

Message from the Guest Editors

The circular economy has emerged as a vital strategy for enhancing sustainability and resource efficiency. This Special Issue will bring together pioneering research on circular economy policy-making, focusing on developing, implementing, and assessing policies that promote sustainability through circular economy practices. Topics include policy development and assessment, economic incentives, financial mechanisms, green finance, technological innovations, stakeholder engagement, public participation, and impact measurement. The purpose of this Special Issue is to provide a comprehensive understanding of current circular economy policies and their potential to drive sustainable development by highlighting effective strategies, identifying challenges, and proposing solutions. This Special Issue will, thus, play a crucial role in shaping the future of sustainable resource management through informed and effective policy-making.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
