

Special Issue

Digital Transformation for Resilient and Sustainable Businesses

Message from the Guest Editor

The rapid advancement of digital technologies, such as AI, IoT, blockchain, and big data, is transforming business operations, creating new opportunities for resilience and sustainability. These tools help companies optimize processes, reduce environmental impact, and quickly adapt to global challenges like climate change. The intersection of digital transformation and sustainability is crucial as businesses seek to balance growth and environmental responsibility. This Special Issue of *Sustainability* explores how digital transformation fosters resilient and sustainable business models. We invite submissions of original research and reviews on topics such as:

- Strategies for digital transformation to achieve SDGs
- Digital technologies' impact on business resilience during crises
- Case studies on sustainable business practices via digital tools
- Emerging technologies in advancing sustainability
- Data-driven frameworks for sustainable management
- Machine learning applications in business resilience

We hope this Special Issue contributes valuable insights for both academic and practical applications. We look forward to your submissions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
