

Special Issue

Sustainable Career Development and Organizational Psychology

Message from the Guest Editors

Career and organizational psychology aim to understand and improve the relationships between individuals and their work environments. These topics include employee motivation, job satisfaction, leadership, and organizational culture. In recent years, there has been growing interest in how these topics intersect with sustainability. For this special issue, authors are encouraged to consider how organizational psychology can promote sustainability in the workplace, what new opportunities, risks, and problems may arise for managers and employees trying to foster sustainable behaviours at work, and how the economy and industry will change, evolve, and sustain. We encourage contributions that combine a high academic standard and innovative insights aimed at providing practical solutions. The issue will include interdisciplinary studies, as well as literature review papers, position papers, and empirical studies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
