

## Special Issue

# Synergistic Approaches to Energy Transition, Circular Economy and the Sustainable Development Goals (SDGs)

### Message from the Guest Editors

We are pleased to invite you to submit your research to this Special Issue. Global challenges such as climate change, environmental degradation, and resource depletion have led to a growing recognition of the need for integrated approaches that address multiple sustainability goals. This Special Issue aims to explore the synergies between energy transition, circular economy principles, and the achievement of specific Sustainable Development Goals (SDGs). It will focus on how sustainable energy solutions and circular economy models can jointly contribute to the global SDG targets, particularly SDG 7 (Affordable and Clean Energy), SDG 12 (Responsible Consumption and Production), SDG 13 (Climate Action), and SDG 9 (Industry, Innovation, and Infrastructure). The issue will provide actionable insights into how policy frameworks, technological innovations, and integrated strategies can advance a more sustainable, low-carbon future. We look forward to receiving your contributions and, together, we aim to contribute valuable insights into how these critical transitions can support the achievement of the SDGs.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
