

Special Issue

Climate Adaptation, Sustainability, Ethics, and Well-Being

Message from the Guest Editor

Global climate change is already negatively affecting and expected to have more dramatic effects on the livelihoods and well-being of communities around the world. There is an emerging body of scholarship, empirical data, and indigenous and community knowledge on diverse aspects of human well-being, climate adaptations, land ethics, and human development. However, there is a significant gap in understanding the deep cause–effect relationships between adaptation strategies, sustainability, well-being, and ethical considerations in different cultures and at an individual, community, and global scale. This Special Issue is dedicated to the nexus between climate adaptations, sustainability, environmental ethics, and well-being. We invite original research articles and bibliographic reviews from all disciplinary fields, including reanalysis of local case studies worldwide, innovative theoretical and methodological frameworks, quantitative and qualitative assessments, applied and analytical studies, and reflective papers on existing and planned initiatives at various spatial and temporal scales.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
