

Special Issue

Advances in Nature-Based Solutions for Sustainable Green Buildings

Message from the Guest Editors

This Special Issue covers “Advances in Nature-Based Solutions for Sustainable Green Buildings”. The focus is both on nature-based building materials and nature-based building-related technologies and systems, such as green roofs and vertical greening systems. Research with the potential to contribute to a wider adoption and documentation of nature-based solutions for sustainable green buildings is also welcomed, as long as it is within the general scope of the journal *Sustainability*. The latter can include, but is not limited to, research that takes an economic, legislative or LCA/LCCA perspective, as well as practically oriented research, e.g., related to irrigation, maintenance, case studies, etc.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
