

Special Issue

Critical Issue on Waste Management for Environmental Sustainability

Message from the Guest Editors

This Special Issue delves into the critical issue of waste management, emphasizing the urgent need for comprehensive solutions that can safeguard the planet and ensure a harmonious coexistence between humanity and the environment. In this Special Issue, original research articles and reviews are welcomed. The area of waste management may be discussed with reference to the following topics:

- Lifecycle thinking
- Prevention over disposal
- Technology and innovation
- Local context
- Stakeholder engagement
- Education and awareness
- Policy and regulation
- Integration with other sustainability goals
- Collaboration and international cooperation

In conclusion, critical thinking is essential in waste management for environmental sustainability as it encourages holistic approaches, innovative solutions, and inclusive practices that address the complex and interconnected nature of waste management challenges. It fosters a shift towards sustainable consumption and production patterns, enabling us to move closer to a more environmentally resilient and responsible future.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
