

Special Issue

Urban Environment and Human Health

Message from the Guest Editors

Urbanization has led to an increase in population density in cities, resulting in the release of pollutants or pollution factors of anthropogenic origin into the urban environment. This increases the risk of human exposure to these adverse factors. To ensure a safe and habitable urban environment for residents and a sustainable development of cities, it is essential that we improve our understanding of the interactions between urban environment and human health. This Special Issue seeks to disseminate the latest high-quality, interdisciplinary research on the characterizations of urban environment-related pollutants or pollution factors and associated human exposure and possible adverse consequences to their health. These pollutants or pollution factors include, but are not limited to, man-made chemicals, plastics, metals and heavy metals, PM2.5, noise, and electromagnetic radiation. We welcome the submission of reviews, original research articles, short communications, systematic reviews, and case studies targeting any of these issues. We also welcome papers that report significant advances in any aspect of related developments.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
