

Special Issue

Sustainability of Agriculture: The Impact of Climate Change on Crops

Message from the Guest Editors

The primary objective of sustainable agriculture is to ensure the fulfillment of current global food and textile demands while safeguarding the ability of future generations to meet their own needs. This entails considering the sustainability of resources, maintaining a healthy environment, ensuring economic profitability, and promoting social and economic equity. This Special Issue focuses on the interplay between climate change and sustainable agriculture. Research areas may include (but are not limited to) the following:

- The impact of climate change on crop production;
- The impact of climate change on food security;
- Adaptable plant genetic resources to abiotic and biotic stress;
- Crop adaptation to climate change;
- Climate-risk-mitigating tools;
- Adaptation processes of agriculture to climate change;
- Precision agriculture, AI, and IoT contributions to crop sustainability under climate change;
- Circular economy and crop adaptability to climate change;
- International initiatives/policies for climate-resilient and adaptive agricultural practices.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
