

## Special Issue

# Big Data Systems Embedded with Intelligence Algorithms for Sustainable Operations Management

### Message from the Guest Editors

This Special Issue aims to present innovative models with embedded intelligence algorithms for dealing with the computing, optimization, and control issues in Big Data systems. It also aims at promoting exchanges and interactions between investigators across different fields in operation management. We solicit high-quality, original research or review articles focused on models and intelligence algorithms for the computing, optimization, and control issues in Big Data systems.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
