

Special Issue

Application of AI, IoT, and Blockchain in Smart Grids with Distributed Energy Resources

Message from the Guest Editors

Communication between all the available components in smart grids is a major challenge. Hence, big data analysis and the internet of things (IoT) are more important for the development of smart grids. Artificial intelligence (AI) is an important technology driver for smart grids. Topics of interest for this Special Issue include, but are not limited to, the following:

- AI for transactive energy
- Energy management by blockchain in smart grids
- Planning and operation of smart grids
- Demand response for increasing the penetration level of DERs
- AI for optimization of smart grids
- Internet of things in smart grid operation
- AI for peer-to-peer energy sharing
- Intelligent control of microgrids
- Resiliency, reliability, and security enhancement of smart grids
- AI for energy demand and generation forecasting in the power market
- AI for battery lifetime estimation in smart grids
- Smart grid flexibility improvement by AI
- AI application for electric vehicle integration in smart grid
- AI for integration of distributed energy resources

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
