

Special Issue

Advance in Urban Rail Transportation Systems

Message from the Guest Editor

Urban railway transportation systems play a crucial role in urban mobility and the social and economic issues of urban contexts. At present, a renaissance of urban rail transit is underway in several cities. Around the world, remarkable advances have been made in urban railway transportation systems and related policies, guidelines, and technical regulations. This Special Issue aims to present a collection of original research articles and review papers on urban railway transportation systems. Topics of interest include, but are not limited to:

- urban rail transit planning, control, and management;
- modern tramway systems;
- light rails;
- fully automated metros;
- intelligent and automated transport system technology;
- traffic flow theory and simulation;
- user safety;
- vehicle-track system dynamics;
- maintenance of railway tracks;
- electrification;
- vehicle engineering;
- environmental impacts (vibration, noise, pollution, etc.);
- structural monitoring; and
- cost-benefit analysis (CBA) of urban railway transportation systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
