

Special Issue

Sustainable Agricultural, Biological, and Environmental Engineering Applications

Message from the Guest Editors

Sustainable development in the agriculture sector is crucial to achieve the 2030 Sustainable Development Goals (SDGs) set by the United Nations (UN). There are lots of challenges to develop modern and intelligent agricultural techniques, tools, and systems, by which sustainable agriculture and food security can be satisfied. Such agricultural, biological, and environmental engineering studies are the need of the 21st century, particularly from the viewpoint of the agricultural water–energy–food security nexus. The recent proliferation and technological advancement in these engineering applications are the focus of this Special Issue. This issue aims to share quality research concerning agricultural, biological, and environmental engineering, and the application of these engineering techniques in the agriculture sector. This Special Issue includes (but is not limited to) engineering technologies and applications related to farm energy and power, farm mechanization, irrigation and drainage, precision agriculture, food processing and storage, livestock and poultry sheds, safe utilization of coal and biomass/biogas, wastewater treatment, etc.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
