

## Special Issue

# Strategic Resource Planning and Decision-Making for Organization Resilience

### Message from the Guest Editors

Across the globe, the pandemic, political regime conflicts, and looming economic crises now, more than ever, underscore the importance of strategic resource planning for organizational resilience. As this title suggests, the purpose of this Special Issue in Sustainability is to address these topics collectively: What roles do resource planning and strategic decision-making play in organizational resilience for global sustainability? What tools or strategies for resource planning and strategic decision-making are used in public or nonprofit organizations in times of crisis? What is the role and impact of external political factors on organizations' sustainable management practices? What role do other external stakeholders play in these? To what extent are social justice and equity issues pursued within a resilient development paradigm. While the Special Issue seeks to generate original research articles, it may include a research note, a policy commentary, or an interview in exceptional cases.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
