

Topical Collection

Circular Economy and Sustainable Strategies

Message from the Collection Editors

The 9R (Responsibility, React, Reduce, Reuse, Re-design, Repair, Recover, Recycle and Rot) development strategy will help to retain materials and products in the economy for as long as possible, saving primary reserves. This Special Issue aims to collect up-to-date research articles that explore, examine and make proposals for a better world, taking into account the environment, human health, as well as the economic benefits. This Special Issue will incorporate articles that examine current policies, qualitative and quantitative measurements in the materials treatment sector and use/reuse, techno-economical aspects, multi-criteria systems for consuming, and closing the loop strategies. Papers on innovative developments, the environment, human health and the economy, reviews and case studies are also welcome.

- Circular economy indicators;
- Circular economy strategies;
- Trash to treasure;
- Life-Cycle-Assessment;
- Business model for circular economy and sustainability;
- Circular, green and bio-economy;
- Consuming strategies and economic optimization;
- Health, safety, environment and management;
- Closing the loop strategies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
