

## Special Issue

# Advanced Research on Agriculture and Food Systems Landscape towards Sustainability

### Message from the Guest Editor

This Special Issue of *Sustainability* will address topics relevant to the agri-food sector, from targeted measures in specific production chain processes to more integrated solutions aimed at organizational changes throughout the entire value chain. Articles that assess the sustainability implications (agronomic, environmental, nutritional, economic, and social impacts or benefits) of the implementation of such technologies and innovations are also encouraged. This Special Issue welcomes original research articles and review articles, as well as theoretical and experimental research articles. The main research topics include:

- Sustainable agriculture and agroecology
- Sustainable natural resource management
- Sustainable food supply chain technologies or management
- Environmental, social, and economic benefits
- Landscape protection
- Land use planning for sustainable agriculture
- Planning for sustainable food systems
- Sustainable food production and transformation
- Bio-economy and circular economy
- Sustainable business model innovation
- Agricultural policies
- Rural development
- Food security

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
