

Special Issue

The Latest Studies on Natural Hazards and Sustainable Civil Engineering

Message from the Guest Editor

Historically, built infrastructure has faced extreme challenges from natural hazards such as earthquakes, landslides, flooding, and tsunamis, among others, some of which affect civil engineering infrastructure more frequently and more severely due to climate change (e.g., flooding). Therefore, the implementation of the latest design and construction innovations, considering the effects of natural hazards, to ensure the adequate structural reliability, sustainability and resilience of the built environment is vital. To address this need, we are pleased to announce a Special Issue dedicated to "The Latest Studies on Natural Hazards and Sustainable Civil Engineering". This Special Issue aims to showcase cutting-edge research, innovative solutions, and interdisciplinary approaches to evaluate/mitigate the effects of natural hazards on civil infrastructure.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
