

Special Issue

The Effect of Recycling on Sustainability of Solid Waste Management

Message from the Guest Editors

This Special issue aim to collect recent researches regarding the recycling of solid wastes, providing advances and understanding of solid waste management and sustainable techniques. The topics include effective recovery, value-added preprocessing, functional modifications, and sustainable management of solid wastes from the perspective of technology, process, mechanism, and research frontier. All topics closely related to the sustainability and management of solid wastes can be accepted. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Separation, purification, and recovery technology of solid wastes.
- Novel technology or process on solid waste management.
- Exploration of novel sustainable applications for solid wastes.
- Novel pre-processing and characterization methods for solid wastes.
- Functional materials derived from solid wastes used for energy, environment, and catalysis and other applications.
- Novel evidences and understanding of recycling on sustainability of solid waste management.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
