

Special Issue

Sustainability and Entrepreneurship

Message from the Guest Editors

The main environmental aspects that sustainable entrepreneurship comprises are related to clean products and services that generate less impact on the environment when used, environmental efficiency and technological development. These are also related to the financial results of the company and have improved the processes of the enterprises notably, for example through the application of ISO environmental quality standards. A sustainable venture can recycle and seeks to reduce the impact of its products/services, sometimes through social service or through functional improvements to its business.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
