

## Special Issue

# Optimizing Logistics and Supply Chain Management towards Industry 5.0

### Message from the Guest Editors

The advent of Industry 4.0 paradigms changed the ways supply chain and logistics processes are managed. However, recent recommendations from the European Commission call for the need to shift towards the so-called “Industry 5.0,” which focuses on three main pillars: human centricity, resilience, and sustainability. This Special Issue aims to stimulate research on potential Industry 5.0-oriented solutions to enhance the management of inbound and outbound logistics, warehouses and inventories, and supply chains. We encourage contributions that address, but are not strictly limited to, the following:

- The use of machine learning (ML) and artificial intelligence (AI) tools for operations management;
- Novel approaches for supply chain resilience management;
- Sustainability of logistics processes;
- Life Cycle Assessment (LCA) of complex industrial systems;
- Innovative solutions for integrating human-centric design, ICT tools, and product service systems (PSS).

Research articles, case studies, and state-of-the-art review papers are welcome. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
