

Special Issue

Progress in Sustainable Smart Tourism: Planning, Developing, Management and Sustainability

Message from the Guest Editors

Smart tourism is an innovative type of tourism as it provides smart technology applications for tourists' on-site experiences (i.e., AR, VR, MR, and intelligent guide systems); however, limited research exists on it. Sustainable tourism requires us to understand the effects of all planning, development, and management on sustainability. This Special Issue aims to present a wide range of papers elucidating cutting-edge progress in sustainable smart tourism relevant to planning, development, management, and sustainability perspectives. We welcome papers that develop state-of-the-art methods for assessing the cutting-edge progress in smart tourism, new frameworks for theoretical or practical implications, and approaches for monitoring economic, socio-cultural, or environmental perspectives with a view of smart tourism to promote sustainable tourism. This Special Issue will elucidate up-to-date, high-quality, international, multidisciplinary, and valuable insights to support smart tourism development, potentially contributing to the literature.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
