

Special Issue

Human–Building Integration Research

Message from the Guest Editors

The relationship between humans and the indoor built environment is a critical issue in the building science domain, and the quality of indoor environments has become more important topic than ever, due to the ongoing COVID-19 pandemic. The purpose of this Special Issue is to provide the latest research findings on comprehensive relationships in human–building integration, regarding thermal comfort, lighting comfort, physiological signals, occupant’s behavior, productivity, perceived air quality, indoor environmental quality, and human sensing technology. This Special Issue will accept original research papers based on field experiments/surveys, lab experiments, statistical analysis, and simulation/modeling, as well as case studies or review papers.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
