Energy and Information Management in Sustainable Transportation

Message from the Guest Editors

The Special Issue “Energy and Information Management in Sustainable Transportation” is focused on sustainability, which is one of the main challenges of the modern world. We welcome papers covering various methods to improve the efficiency of transportation and energy management, different information services that support the implementation of new solutions, and any research that may contribute to the environmentally-friendly transportation. Topics covered in the Special Issue include, but are not limited to the following:

- Intelligent transport systems (ITS)
- Sustainable transport
- Environmentally-friendly travel solutions
- Electromobility
- Smart grid services
- Optimization of energy usage in transport networks
- Information and communication technology (ICT)
- Shared mobility services
- The external cost of transport
