

Special Issue

Just Food System Transformations

Message from the Guest Editors

The continued growth of the world's population and the increasing prosperity of people over the next three decades will require an increase in food production. At the same time, these huge quantities of food must be produced in a way that protects the environment and will not have a negative impact on climate change. To achieve this, it will be necessary to change the way food is produced. Future technologies, system innovations, and unconventional raw materials are key to the expected transformation of the food system. These innovations range from sustainable food production to postproduction waste management. The purpose of this Special Issue of *Sustainability* is to present original scientific articles as well as review articles on new technologies in the food system, unconventional food products, and waste management practices as well as consumer acceptance studies for the proposed solutions for food system transformation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
