

Special Issue

Climate Changes and the Global Environment: Strive for the Path of Sustainable Development

Message from the Guest Editors

This Special Issue aims to widen conversations and find empirical evidence on the economic consequences of climate change, especially in developing countries, to deepen our understanding of this topic. It also aims to present empirical research on the global subject and policy implications of climate change. Climate system variations are leading to financial and economic impacts that are already affecting the economy (Rising et al., 2022). While we know the climate will change, the local and regional implications for communities and economies are unknown (Kundo et al., 2022); policymakers disagree regarding the assumptions and actions taken to combat recent issues. Instead of making future-optimized selections, decision makers should make sound and robust decisions (Pörtner et al., 2022). This Special Issue aims to expand the scope of current debates; specifically, climate change is predicted to have significant implications on economic sustainability (Aglietta and Espagne, 2016; Batten et al., 2016; Scott et al., 2017; Monasterolo et al. 2019; Kotchen, M. J. 2020).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
