Wastewater Treatment Technology and Environmental Impact Assessment

Message from the Guest Editors

Technologies for the treatment of urban and industrial wastewater are now suitable for new methods of use and for the use of raw resources. These processes are also in line with environmental regulations. In fact, if industrial organizations are perfectly aware that our water sources are not infinitely available, they are also perfectly aware of the need to treat them. Effluent treatment is currently carried out in a systematic way. The treatments have to respect all of the reject norms in order to send high-quality water into the natural environment. Environmental impact assessments are an important tool for environmental managers and acts as a prediction instrument to determine the impact of an operation on the environment during project planning phase until project abandonment. Environmental sensitization challenges the economic and social dimensions of sustainable development from environmental issues. It aims to bring people and communities to appreciate the complexity of the environment, both natural and human-made. Environmental sensitization remains one of the ways that will lead to the better control of environmental pollution in organizations.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
