Management of Solid Waste

Message from the Guest Editors

Waste reduction and valorization need to be taken to a new level of performance. Despite being harmful to the environment, solid waste has a great potential of recycled materials, new by-products, and cleaner sources of energy. However, issues regarding adequate transformation techniques, legislation and economics aspects still need to be solved to achieve an efficient and sustainable management. The adaptation of all these topics to various scales of territories is not completely treated also.

- Recovery of waste, both in terms of new materials and energy
- Life cycle analysis and circular economy applied to solid waste management
- Economics and waste management
- Legislation, environmental, and management of solid wastes
- Methodologies for solid waste management in insular, rural, and remote areas
- Microbiology, physics modelling, and experiments for solid waste management and process
- New tools or databases for evaluation of solid waste management

Keywords: Solid waste management Waste-to-energy technologies New tools or databases Waste reduction and valorization Recycled materials and energy Legislation Microbiology

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
