Impacts of COVID-19 on Tourism

Message from the Guest Editors

The COVID-19 pandemic created an unprecedented shock to the tourism sector. Before the pandemic, tourism was one of the main sources of economic growth and job creation. Tourism was among the first sectors affected by the pandemic; due to the travel restrictions, limited availability of services (e.g., restaurant and hotel closures), social distancing, the broader economic problems caused by the pandemic and the perceived travel risks have led to the fell of tourist arrivals worldwide. The crisis has put millions of businesses and jobs at risk and caused macro-economic problems as well. The availability of vaccines made the pandemic more or less manageable, but the crisis is not over yet; new virus variants emerge, and the vaccination levels are varying across populations. Thus, the future of the tourism sector remains uncertain.

- changing travel preferences and patterns
- national, regional and local policies supporting the survival and recovery of tourism
- crisis management in tourism
- planning and forecasting in tourism
- analysis of tourism indicators
- innovative data sources and analysis
- innovations in tourism in relation to the pandemic

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
