

Special Issue

Nature-Based Solutions— Concept, Evaluation, and Governance

Message from the Guest Editors

'Nature-Based Solutions' is a rapidly evolving topic that has gained increasing attention and is now at the top of political agendas worldwide. According to the EU definition, Nature-Based Solutions are adaptation and risk mitigation measures inspired by nature and continuously supported by natural processes. They are recognized worldwide as relevant tools for climate adaptation and disaster risk reduction. Designed to address various environmental challenges in a resource-efficient and adaptable manner, they also aim to provide economic, societal, and environmental co-benefits by enhancing biodiversity and providing multiple ecosystem services. This Special Issue on nature-based solutions aims to provide a forum for presenting current original research covering the different aspects of Nature-Based Solutions, from technical reflections on human–nature interactions and policies to innovations resulting from co-design and co-creation processes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
