

Special Issue

Assessing The New Urban Agenda

Message from the Guest Editor

This Special Issue comprises papers that analyze the major global initiative on urban sustainability. At Habitat III in Quito in 2016, the UN adopted a New Urban Agenda to guide sustainable urban development across the globe for the next twenty years. Papers covered in this special issue will address the technical, administrative, social and environmental consequences of the New Urban Agenda. What are the mechanism used to achieve the goals and what are the possible sources of failure and success? Papers can also discuss examples of implementation, critiques of methods and underlying ideologies. Papers that focus on specific themes and/or specific cities will be particularly suitable. The Special Issue will act as a primer for those wanting to understand the origins and significance of the New Urban Agenda, its basic tenets, its relevance and assessments of likely success. Papers selected for this special issue are subject to a rigorous peer review procedure with the aim of rapid and wide dissemination of research results, developments and applications.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
