

Special Issue

Orange Economy in the SARS-CoV-2 Era

Message from the Guest Editors

This Special Issue on the orange economy in the SARS-CoV-2 era seeks to fill a gap in theory relating to cultural and creative industries in the context of crisis. This Special Issue is focused on but not limited to the following topics:

- How are businesses in one or more of the industries mentioned redirecting their strategies under the new social norms and policies that have come with the health crisis?
- What are the characteristics of these new markets, and how are businesses' distribution chains adapting, especially in terms of contact with different stakeholders?
- How have marketing and commercialisation strategies changed under these new circumstances?
- How are the changes brought by SARS-CoV-2 affecting sustainability?
- How are these changes affecting organisational relationships and cooperation? (share experiences, knowledge creation, best practices);
- How are the changes affecting industries that include artistic creation in their value chain?
- In these circumstances, how are network interaction and collaborative ecosystems affected?
- New work spaces and dynamics in the "new" society.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
