

Special Issue

Sustainable Water Resource Management and Agriculture Development

Message from the Guest Editors

Water is essential for the survival of humankind, animals and plants, delivering critical ecosystem services. Yet water resources are ineffectively managed in many parts of the world, aggravating the global water crisis. Climate change has also exacerbated this crisis; rising temperatures and changing precipitation patterns have intensified water shortages and increased the frequency and magnitudes of floods and droughts. This special issue aims to bridge the knowledge gap in the scientific literature concerning sustainable water resource management and agricultural development. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Bridging the gaps in the water-food(-energy) nexus
- Agricultural water management
- Climate change adaptation in water management
- Water conservation practices
- Irrigation practices
- Adoption of water-saving technology
- Policy intervention and integration
- Water market and water pricing
- Virtual water trade

We look forward to receiving your contributions. , and

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
