

Special Issue

Rhizo-Microbiome for the Sustenance of Agro-Ecosystems in the Changing Climate Scenario

Message from the Guest Editors

The extensive and non-targeted use of various agrochemicals results in pesticide resistance. The crop microbiome and plant-growth-promoting rhizobacteria (PGPR) plays a strategic role in the improvement of crop production under a changing climate, antioxidant defense and nutrient uptake in plants, sustainable management of plant disease (biocontrol), and seed priming. Currently, the increased awareness of the importance of microorganisms for plant and soil health has fueled a boom in research on PGPR. This Special Issue on “Crop Microbiome for the Sustenance of Agro-Ecosystems in the Changing Climate Scenario” aims to gather contributions from scientists working in diverse disciplines related to: The crop microbiome in plant health, plant immunity, plant defense, and plant growth promotion; The crop microbiome in plant defense mechanisms; Resilience of the agricultural microbiome to climatic changes; Plant-growth-promoting rhizobacteria (PGPR) for the improvement of crop production;

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
