Land Use/Cover Change and Its Environmental Effects: Second Edition

Message from the Guest Editor

In order to promote the realization of “double carbon”, ecologically sustainable development, and harmonious development between humans and nature, the impact of land use/land cover change on the environment has become one of the developing trends of global ecological sustainable development. It is considered to be the main topic of research interest, with a focus on the number of changes, the size of the impact, and the delicate relationship between them. Specifically, the first area of focus in this field is the new technologies and methods applied to remote sensing monitoring of land use/land cover change. The second focus is the quantitative evaluation of the impact of land use/land cover change on the environment and how it has developed rapidly in recent years. The innovative applications and service modes of thematic information of land use/land cover change have also become a focus of attention. All of these research fields cover different scales, such as global, regional, and specific ecological units.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
