

Special Issue

Migration-Refugee Policies and Socioeconomics, Well-Being and Sustainable Outcomes

Message from the Guest Editor

In the Special Issue, we are interested in presenting original primary research on policies facilitating migrant and refugee needs. Such an approach could spur sustainable economic development on both the micro and the macro level, namely, individuals and economies.

The Special Issue examines policies, frameworks, initiatives, humanitarian actions, public administration, and technological advancements that could affect (i) migrant and refugee well-being, human capital, employment, housing, health/mental status, and entrepreneurship; and (ii) societies' sustainable development in terms of superdiversity, innovation, and economic growth. This Special Issue invites high-quality contributions that include, but are not limited to, the following areas:

- Migration/refugee policies, public administration, and migrant/refugee well-being and socioeconomic outcomes.
- Education, vocational training, and migrant/refugee well-being and socioeconomic outcomes.
- Humanitarian actions, and migrant/refugee well-being and socioeconomic outcomes.
- Technology, and migrant/refugee well-being and socioeconomic outcomes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
