

Special Issue

Sustainable Management and Conservation of Wetland Ecology

Message from the Guest Editors

Wetlands are one of the most productive habitats on Earth, and they support many kinds of life. Wetlands produce many environmental and socio-economic benefits for humans locally and globally, such as fertilizing soils for agriculture, and providing food such as fishes, shrimps, and crabs. Additionally, wetlands play vital roles in the entire biosphere: producing oxygen, storing carbon, and processing nitrogen. With the significant loss of wetland areas and the degradation of its ecological functions due to rapid economic and social development worldwide in the last century, the efficient conservation and sustainable management of wetland ecosystems have become key to decrease the risk of losing valuable wetland-related benefits, and to help achieve the United Nations Sustainable Development Goals (SDGs). This Special Issue shall contain selected contributions on advances in the synthesis, characterization, and application of multiple topics, including, but not limited to, wetland restoration, wetland biogeochemistry, wetland ecohydrology, sustainable development, gross ecosystem production, and nature-based policy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
