

## Special Issue

# Sustainability and Mental Health of Employees

### Message from the Guest Editor

Technological progress, competitive environments, and increasing demands at work have become real challenges for employees; quite often, they must take on more responsibilities, maintain a high work tempo, and face constant changes. All these factors have a negative impact on mental health, resulting in a reduction in the potential of human capital. Employees suffer from various mental health disorders, the most common of which are stress and burnout. Worldwide, people are trying to find effective remedies to help alleviate mental health imbalances due to the negative effects of emotional tensions at work. This Special Issue aims at gaining theoretical knowledge and empirical evidence on sustainable Human Resource Management practices for strengthening the mental health of employees. For further reading, please visit the [Special Issue website](#).

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
