

Special Issue

Sustainable Technologies by Advanced Anaerobic Wastewater Treatment

Message from the Guest Editors

Wastewater treatment in the anaerobic approach offers many advantages compared to the conventional activated sludge (CAS) process, such as a small footprint, less waste sludge production, low greenhouse gas emissions, low cost, and energy recovery potential. The configuration of reactors used in the anaerobic treatment generally includes continuous stirred tank reactor (CSTR), an up-flow anaerobic sludge blanket reactor (UASB), an anaerobic membrane bioreactor (AnMBR, which combined the anaerobic digestion with membrane separation), and microbial fuel cells. In the anaerobic treatment process, the technologies included not only traditional anaerobic digestion, but also some approaches based on newly discovered anaerobic microorganisms. This Special Issue on "Sustainable Technologies by Advanced Anaerobic Wastewater Treatment" of the Journal of *Sustainability* aims to highlight the recent advancements on anaerobic treatment technology in wastewater treatment and discuss the challenges and opportunities for the future development. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
