

## Special Issue

# Technologies and Innovations for Sustainable Air Transportation

### Message from the Guest Editors

COVID-19 has been a major disaster in the airline industry, including airlines and airports. To survive COVID-19, the air transportation industry, including airlines and airports, must develop innovative strategies and technologies for the economic, social, and environmental sustainability of its eco-system. This Special Issue will cover topics including (but not limited to): 1) identifying and developing innovative technologies in the air transportation eco-system; 2) airline/airport strategies to improve economic, social, and environmental sustainability; 3) policy developments and their implications to survive the COVID-19 crisis. Both theoretical and empirical contributions are encouraged.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
